Matthew,

I do not program in IDL but in Pv-Wave I would use the following code:

```
st = DC_READ_FREE(filename, col_1, col_2, col_3, col_4, col_5, col_6,  
/col, Resize=[1,2,3,4,5,6], NSkip = 2)
```

you can also add a parameter which tells the function wha teh delimiter
is in you data
for example

Delim = [','] .. for comma delimited files
