Hi,

This is a Solicitation Email, we are looking for new TUFF'97 DISTRIBUTORS. TUFF'97 is a promotional concept for a prospect follow-up system called "Simple Track". Software designed for Windows 95, 3.11 and NT machines. (Macintosh users read the NOTE below(*))

Concept:

The TUFF'97 software includes a copy of Simple Track, so you can use this for your own personal administration (free). However, the TUFF'97 software is designed to give you BIG TIME credits for just taking the efforts to PROMOTE it.

How do I get those credits?. Easy, just distribute/promote it. How? (Give away the software for free, put it on your website/homepage and let everyone download it. Give it to your friends, attach it by email etc). With a one time \$40.00 (USD) validation code purchase, YOUR name becomes part of all software you sent out to your customers. When your TUFF'97 software gets validated, all your personal information is automatically integrated in the software, so everyone knows how to reach you by phone/fax or email and where to sent the check/money or cash orders.

Basically this is the concept. Offcourse you need the software to grasp the whole thing. Believe it, there is absolutely no marketing knowledge required, just ask for the software package, join and start promoting your own TUFF'97 line. The only thing you DO need is a PC or Mac(*) and Internet.

(*) TUFF'97 is only available for MacOS users running Connectix VirtualPC or Insignia's Sofwindows 95/3.11. A true MacOS version is not available.

When you're interested in becoming a TUFF'97 distributor and create your own distribution line, sent a <mailto:FiReStArTeR@frodo.com> and ask for your copy of the TUFF software (We'll sent you a download location and install instructions). This is a serious opportunity, so only serious responses are processed. If you're not interested, have a nice day.

Best Regards,

Tony Scott
