
Subject: Plot with X-Axis ticks as string

Hello everyone!

I'd like to plot monthly values of a parameter. The months go from April to November. How can I implement ticks at the x-axis which are simple strings, e.g. 'Apr', 'May'

So I plotted something and I tried to add a fitted x-axis to the plot as follows:

```
myplot_c1 = PLOT(parameters, NAME='Cluster', COLOR='red', XTEXT_COLOR='white',
YSTYLE=2, XSTYLE=3, YTITLE='Parameter', MIN_VALUE=-1, MAX_VALUE=1,
XTICKINTERVAL=1, YRANGE=[0.15,0.5])
```

```
xax = AXIS('X', LOCATION=[0,0.15], TICKVALUES=['Mar','Apr','May','Ju n','Jul','Aug','Sep','Oct'],
MINOR=1, MAJOR=-1, TICKLEN=0.015, TICKFONT_SIZE=11, TICKINTERVAL=1)
```

Somehow the monthly ticks just won't appear.

Any suggestions?

Cheers,
Kai
