## Subject: exelisvis.com is now harrisgeospatial.com
Posted by Jim  Pendleton on Thu, 04 Feb 2016 15:24:52 GMT

Though they will likely be redirected into the future, any links you have been using for exelisvis.com have been superceded by harrisgeospatial.com.

Fortunately, the names "IDL" and "ENVI" haven't changed.

While I'm right here, today's IDL Data Point blog is on the topic of calling the statistical package R from IDL via the Python bridge.

I'm speaking as a private citizen rather than as a representative of Harris Corp.

Jim P.
