Subject: Connect STK and IDL ?
Posted by salsathomson on Mon, 08 Feb 2016 18:32:58 GMT

Hi All

I am unsuccesfully attempting to connect STK (Systems Toolkit) and IDL using COM objects. I would like to be able to create a new scenario and objects within STK from IDL and then retrieve data from STK into IDL. It seems like this should be possible. Has anyone done this before ? Could you offer a few lines of IDL code that would demonstrate this ?

Thanks for any help.

Alan
