Yes I am doing the same,

```
IDL> a=mrdfits('2QZJ0234_CHIP1_GDIS_600V_SCIENCE_SKY_SPECTRUM_FOR
S1.2007_11_12T05_08_04.084redwave.fits',0,h)
```

```
MRDFITS: Image array (2094,5) Type=Real*4
```

```
IDL> fname='data1.dat'
```

```
IDL> OPENW,1,fname
```

```
IDL> PRINTF,a
```

then i am getting error:

```
% PRINTF: Expression must be a scalar or 1 element array in this context: A.
```

```
% Execution halted at: $MAIN$
```

I don't know how to solve this error. Any idea??
