if my_awk command is : -v var="\$i" '{print \$var} then how i will proceed??

I am doing:

```
cmd ='awk -v var="$i" '{print $var}' ' + fname[i] + ' > ' + fnameout[i]
```

and on:

print,cmd I am getting:

```
IDL> print,cmd
```

```
% PRINT: Variable is undefined: CMD.
```

```
% Execution halted at: $MAIN$
```
