Hello,

I am using this part of IDL

```
for i=1,c do begin  
  fnameo[i]='tmp'  
  cmd ='awk -v var="$i" "{print $var}" ' + fname[i] + ' > ' + fnameo[i]  
  spawn, cmd  
endfor
```

where tmp is a new file i want to create, it is showing error fnameo[i] not exist.
Where I am wrong???
