---

Hi

I created a floating point array using the FINDGEN function, e.g. A = FINDGEN(10).

I want to change the default starting point and make it 0.5. Also I want the maximum point to be 7.5 instead of 9 (but still be a 10 floating point array).

Can anyone help with this?

I am using an old version of IDL so I cannot use the keyword START and INCREMENT to change the defaults.

Thank you
