there are there are misunderstanding
I know the IDL save file restore as
restore,file='D:\Science\work\nb000.sav'
I have folder contains 74 save files, If I restore every file as
restore,file='D:\Science\work\nb000.sav'
restore,file='D:\Science\work\nb001.sav'
....
It will take many lines, I want other method to doing this
