Hi,

while i'm able to overlay a polygon shapefile over raster(geotiff) using imap as shown below:

```
imap,REFORM(ortho2[0,*,*]),/order,GEOTIFF=gtiff_VI_l_shrinke d,RGB_TABLE=8
imap,roi_shapefile,OVERPLOT=1
```

I'm unable to do the same using MAP function, which replaces the functionality of imap. My objective is to do this without using itools. Can this be done?

Regards,
Puneeth
