Hi,

I tried, but still got error like this:

```
IDL> result=mg_h5_getdata('E:\netcdf4.nc', 'varname')
% H5F_OPEN: unable to open file: Object Name:"E:\netcdf4.nc"
% Error occurred at: MG_H5_GETDATA   446 D:\Program Files
(x86)\ITTT\IDL71\lib\hdf5\mg_h5_getdata.pro
%           $MAIN$
% Execution halted at: $MAIN$
```

Where did I go wrong?

Thank you very much!
