Hi all,

In the following program I am not able to zoom in-out my plot:

```
pro pltdat4, file
```

```
  Readcol,file,a,b,c,d
```

```
  wplot,a,b
```

```
  wplot,a,d,color=2
```

```
openw,3,'final.sh'
```

```
tt=""
```

```
Print,'Is it final?:'
```

```
  Read,tt
```

```
wait,1
```

```
  if (STRMATCH(tt, 'y', /FOLD_CASE) EQ 1) then begin
```

```
    printf,3,format='(A,2x,A)', 'cp',file
```

```
  endif
```

```
  close,3
```

```
  spawn, ' chmod +x final.sh'
```

```
return
```

```
end
```

However when I am simply doing

```
pro pltdat4, file
```

```
  Readcol,file,a,b,c,d
```

```
  wplot,a,b
```

```
  wplot,a,d,color=2
```

```
return
```

```
end
```

I am able to zoom in-out my plot any solution???
