Hello,

I am trying to run a script I found in internet for mapping, but I can not do it, the message is:  
Attempt to call undefined procedure/function:

I follow the instructions: <http://www.harrisgeospatial.com/Support/HelpArticlesDetail/TabId/219/ArtMID/900/ArticleID/4326/4326.aspx>

But there is not a variable with the name IDL\_DLM\_PATH in my computer.

Any advice ?! Thanks
