Hello All,

I have a file say:
Detail.txt with contents

name [1,2,3,4] [50.1,60.2,3.1,33.2]

I want to read this file, such as,

```
readcol,'Detail.txt',f='(A,I,F)',name,arr1,arr2
```

Such that I should get:

```
arr1[0]=1
```

```
arr2[0]=50.1
```

Can It be done?

Or other way out?
