Hello All,

How can I append contents into a file using forprint?

What I want to do...

For eg.

```
a=findgen(100)
```

```
b=findgen(100)
```

```
forprint, 'Numbers are:', text='tt.dat'
```

```
forprint, a,b,text='tt.dat'
```

I want all these to be appended in same file named tt.dat here.

How can I do??
