Subject: SPAWN result

Hello,

I have a wget spawn command that runs every night and is terminated in the morning by another program if it has not finished downloading. What I would like to know is how can I tell if the process completed on its own or was terminated. I've tried including RESULT and ERROR in the call, but they both return empty strings.

SPAWN, WGET_CMD, WGET_RESULT, WGET_ERROR

Is there anyway to figure out if this job completed or was terminated? I could check the last line of the log file, but I was hoping there was an easier way.

Thanks,
Kim
