Subject: MWRFITS not writing header

Posted by tho.siegert on Mon, 06 Jun 2016 11:28:04 GMT

Hi,

I am trying to write a struct to a fits file and want to put a header into the header of the fits file. Writing the struct is fine but the header is not present at all after the file has been created or an extension has been added.

For the header I am reading another fits file's header and simply want to use this one. Doesn't work either.

Even the minimal example

a=lonarr(10,10,10)
hdr='COMMENT This is a comment line to put in the header''
mwrfits,a,'test.fits',hdr

does not include the head in the "test.fits" file.
I get no errors.

I cannot use writefits because the input struct is not accepted by the program.

Any suggestions?

Thomas
