Subject: Plotting time as x-axis
Posted by sg26041991 on Fri, 15 Jul 2016 15:21:08 GMT

I am trying to plot time in HH:MM:SS format.
I have used 'label_date' and 'timegen' command. But I want to fix an axis range that is greater than my data array, so that I can plot similar graphs on the same plot using 'overplot'. It would be really helpful if anyone can tell me how.
