I have a table in fits format. But when i read the fits file as

```
clv=readfits('example.fits')
```

```
help,clv
```

```
CLV      LONG    =      -1
```

How do i open the file definitely its not a single value it is actually a table.
please help me out in knowing the values of the table.

thank you
