Subject: "Automatically indent lines" breaks copying and pasting code

Hi,

I have the "Automatically indent lines" option set in the Eclipse preferences under "IDL / Editor".

However, this option breaks copying and pasting code. When I copy a section of code and paste it somewhere else, the indentation of the code is completely different, presumably due to the "automatic" indentation.

This is very inconvenient. Is there a way to turn off the automatic formatting when pasting code, which is presumably already formatted according to the coder's wishes?

thanks

Mark
