Dear All,

I have a structure STR which has 43 tags.

IDL> print,N\_tags(STR)

43

IDL> PRINT, TAG\_NAMES(STR)

SLIT\_ID XTOP YTOP.....ROW\_9

I want to print value of ith tag of STR without mentioning the

Tag name. Can any one help??

can I do something like this?

IDL> print,STR.(ith\_tag\_name)
