Nice catch! Yes, TVRD() works consistently on both my Mac and my Linux box when I have set pixmap backing store (either IDL_GR_X_RETAIN = 2 or device,retain = 2). And TVRD() does not work consistently when RETAIN = 0 or RETAIN = 1. Thanks, --Wayne

> Hmm, it seems to depend on the type of backing store. On my El Capitan Mac Pro it works fine when set to Pixmap but fails for the others. It will take someone more knowledgeable than me to explain why. Just out of curiosity, is the default backing store different between your Linux and Mac? Or does it work correctly regardless of the backing store setting on the Linux computer?
