
Subject: color rendering with hp660, ghostview and windows95

I'm using IDL V5 on a win95 machine (16 bit graphics). To print out graphics I generate .ps files and then preview them with ghostview, and print out on an HP660 printer.

The colors of the printout are much darker than the previewed ones on the ghostview window. Any ideas how I can control the color of the printout?

TIA,
