By default FIX() returns an integer type, which ranges from -32768 to +32767. You need to use the TYPE keyword to specify an output type appropriate for your situation. For, instance setting "TYPE = 3" (Long integer) behaves as you would expect:

```
IDL> print, fix(40251.00, type = 3)
    40251
```

IDL Documentation: <http://www.harrisgeospatial.com/docs/FIX.html>
