I'm trying to use ENVI_DOIT to create a vector file from a raster file:

```
ENVI_DOIT, 'rtv_doit', $  
  fid=fid, pos=pos, dims=dims, $  
  IN_MEMORY = LINDGEN(N_ELEMENTS(values)), $  
  values=values, l_name=l_name, $  
  out_names=evffile
```

Does anyone have an idea how to do that?

Thanks, Peng
