---

Hi -

Our group has not yet moved to 8.6 but we would like to use the idl-python bridge package with 8.5.1 (rhel6 , anaconda 2.7) Apparently the setup.py script now in 8.6 does a number of things , but I cannot find setup instructions for 8.5.1 . Or, if anyone knows what needs to be done for the setup , is it more than appending PATH,PYTHONPATH and PYTHONHOME ?

Thanks

Alex
