Subject: Reading tab delimited ascii files (columns)

Hello,
   I followed the postings a little while back on reading ascii columns
out of a file into IDL arrays. Someone suggested a program that is
available from a ftp site, but I forgot to note it down.Note, for what I am
doing, speed in reading is very important.
 I would appreciate it if someone would sent me some pointers to
such related programs again. Personal email is fine, since this thread
was already finished in this newsgroup.

Thanks,
Mila Mitra
