<http://stackoverflow.com/questions/38468764/idl-python-bridge-fails-due-to-sip-on-osx-el-capitan>) to set up the path, but still got the same error. Here are the steps I did on my mac:

>>

>> =====

>> First, set up the paths:

>> export PATH /System/Library/Frameworks/Python.framework/Versions/2.7/bin :\${PATH}

>> export PYTHONHOME /System/Library/Frameworks/Python.framework/Versions/2.7

>> export PYTHONPATH /Users/username/Applications/exelis/idl/bin/bin.darwin.x86\_64

>> export PYTHONPATH \${PYTHONPATH}:/Users/username/Applications/exelis/idl85/lib/bridges

>>

>> Then, for the IDL-to-Python bridge, run the following commands:

>> cd Applications/exelis/idl85/bin/bin.darwin.x86\_64/

>> sudo install\_name\_tool -change libpython2.7.dylib

/System/Library/Frameworks/Python.framework/Versions/Current /lib/libpython2.7.dylib  
pythonidl27.so

>>

>> For the Python-to-IDL bridge (some of these are duplicated from above):

```

>>
>> cd Applications/exelis/idl85/bin/bin.darwin.x86_64/
>>
>> sudo install_name_tool -change libidl.8.5.dylib @loader_path/libidl.8.5.dylib pythonidl27.so
>> sudo install_name_tool -change libidl_ips.8.5.dylib @loader_path/libidl_ips.8.5.dylib
pythonidl27.so
>>
>> sudo install_name_tool -change libpython2.7.dylib
/System/Library/Frameworks/Python.framework/Versions/Current /lib/libpython2.7.dylib
pythonidl27.so
>>
>>
>> At this point, DYLD_LIBRARY_PATH is still needed in the .login to specify IDL's bin
directory. To eliminate that, the following updates can be made to tell various libraries where to
find their dependencies:
>>
>> sudo install_name_tool -change libMesaGL6_2.dylib @loader_path/libMesaGL6_2.dylib
libidl.8.5.dylib
>> sudo install_name_tool -change libMesaGLU6_2.dylib @loader_path/libMesaGLU6_2.dylib
libidl.8.5.dylib
>> sudo install_name_tool -change libOSMesa6_2.dylib @loader_path/libOSMesa6_2.dylib
libidl.8.5.dylib
>> sudo install_name_tool -change libXm.3.0.2.dylib @loader_path/libXm.3.0.2.dylib
libidl.8.5.dylib
>> sudo install_name_tool -change libMesaGL6_2.dylib @loader_path/libMesaGL6_2.dylib
libMesaGLU6_2.dylib
>> sudo install_name_tool -change libMesaGL6_2.dylib @loader_path/libMesaGL6_2.dylib
libOSMesa6_2.dylib
>> sudo install_name_tool -change libidl.8.5.dylib @loader_path/libidl.8.5.dylib libidl_ips.8.5.dylib

Mac. It's either missing a bunch of libraries or they're too old. You're better off installing a version
of Anaconda, preferably containing Python 3.5.

```

Thanks very much for your advice Chris! I'll install Anaconda and see if it works.

Cheers,  
Huazeng
