
Subject: syntax error with hash

Hi,

I am running IDL 8.5.1. on a recent MacBookPro (10.12). I want to create a hash, however, when I do this I get a syntax error:

```
IDL> test_hash = hash()
```

```
test_hash = hash()  
              ^
```

% Syntax error.

Does anybody have a clue why this does not work?

Many thanks

Marko
