Hi Chris - Thanks, but no joy. I've also tried changing the browser preference from Firefox to Safari.

I still have older versions of IDL installed (back to 8.2) and the help function works with them. Right now, if I find I need to access help, I just launch an older version and use that. It's an annoyance, but not debilitating.

I'd like to understand why the fix doesn't seem to work for me, but it isn't critical.

Barry
