Subject: Re: IDL (8.6.0) Help not working after update to MacOS Sierra 10.12.5
Posted by BLesht on Fri, 04 Aug 2017 20:04:26 GMT

Hi Chris - Just updated to 8.6.1. I still cannot access help, so obviously something else is going wrong. I checked the online_help_html file and as you said, it has the 'fix' applied. I see that there is a note about the DYLD library path. Maybe I should check that.
