might it be your syntax is wrong?

extract form mpfitexpr.pro:

```
> ; parms = MPFITEXPR(MYFUNCT, XVAL, YVAL, ERR, start_parms, ...)  
> ; KEYWORD PARAMETERS:  
> ; WEIGHTS - Array of weights to be used in calculating the  
> ; chi-squared value. If WEIGHTS is specified then the ERR  
> ; parameter is ignored. [...]
```
