Subject: IDLDE with ubuntu16.04 trouble the windows
Posted by plana on Thu, 21 Sep 2017 14:05:28 GMT

Hi

I recently upgrade ma machine with Ubuntu 16.04. I am using IDL8.2 and the IDLDE environment is not working well. What I mean is that the IDLDE is launched but the main window is not display properly (no name on the tags for example) stuff like that. IDL help desk sent me a list of library to install (see below), whcih I did except for one "xlibxpm-d". But the problem remains. Some had a similar prb ?
Thanks a lot

Henri

sudo apt-get install libxp6
sudo apt-get install libxp-dev
sudo apt-get install libxmu-dev
sudo apt-get install libxmu6
sudo apt-get install xlibxpm-d
sudo apt-get install default-jre
