Hi,

I wonder if someone could show me how to read a data with dates as structure.

I need to read thousands of files each with thousands of lines e like this one:

FileIn1:

```
2015-06-01 11:02:28 -17.8620 -34.3080 -12.1940
2015-06-01 11:02:29 -12.4835 -24.4790 -8.8535
2015-06-01 11:02:30 -10.9240 -22.0480 -7.8587
2015-06-01 11:02:31 -11.6355 -22.9650 -8.0603
2015-06-01 11:02:32 -12.7080 -26.4340 -8.5855
2015-06-01 11:02:33 -12.4525 -24.8820 -8.4100
2015-06-01 11:02:34 -11.2980 -23.5610 -7.9932
2015-06-01 11:02:44 8.8110 12.8375 4.2657
2015-06-01 11:03:00 -5.4033 -10.9245 -3.4665
2015-06-01 11:03:01 -9.4730 -19.0120 -5.6915
```

I done this:

```
=====
```

```
Pro ReadMyData
```

```
FileIn='FileIn1'
```

```
Close, /All
```

```
nlines=File_lines(FileIn)
```

```
datastruct={MyDate:' ', MyTime:' ', var1:0.0, var2:0.0, var3:0.0}
```

```
Mydata=Replicate(datastruct, nlines)
```

```
Mydata.MyDate = STRING(Mydata.MyDate, FORMAT = '(A10)')
```

```
Mydata.MyTime = STRING(Mydata.MyTime, FORMAT = '(A10)')
```

```
OpenR,lun, FileIn,/Get_Lun
```

```
ReadF,lun, dataw
```

```
Free_Lun, lun
```

```
End
```

```
=====
```

But i get the error message: READF: Input conversion error. Unit: 100.

I will appreciate any assistance.

Thanks
