I have participated in the standard "Please put me on your mailing list" letter and found it to be worth my time (I get 1 or 2 handfulls or letters every day) but I also found that it's results were nowhere near what I expected due mainly to people not sending in the money but rather spreading the letter without paying for it. I participated in that mainly as an experiment and found that there are a tremendous amount of people willing to do it. I thought about how to, first, eliminate the "non-pay" problem and, second, to create a monthly income. I came upon the solution and decided to start a new program. I decided that there were 3 things that this new program needed in order to work for everyone and they were: 1.) It needed to be very simple and easy for anyone to do, and, 2.) It needed to be inexpensive enough for even the poorest of people, and, 3.) It needs to be DUPLICATABLE. I think you will find this program to meet those requirements. I have put lots of thought into it and I ask that you PLEASE do NOT modify it. This WILL WORK if you follow it. This system is based on the unconditional "loaning" of money to people. Simply say, "I am loaning you this \$2 as an act of goodwill to help you in your financial need, you may pay me back if and when you can." You should find 5 or more people who will send \$2 to the 5 needy people on this list AND MAINTAIN 5 or more people who will do the same. You should put your name on position number 5 and move each of the other names up one position. The name originally on position number 1 gets removed. You should be able to contact each of your 5 or more people to see if they are going to be active this month. If not then you need to find one or more people to be active in order to maintain at least 5. I am not speaking about the 5 people on the list but rather the 5 new people you have found. I would highly suggest having more than 5 in any given month. Now I know that this would be extremely easy to do since I can think of at least 20 people myself who will do this consistently. The key is to maintain at LEAST 5 active people. If you don't then you can't expect for the rest of the people to do it either and you can't expect for this system to work. This system is a no-brainer, and if someone can't afford the \$10 + stamps for this then they truly ARE in need! It is OK to use the internet to find people but I think it would be easier to find them through people that you know. This way it will be easier for you to contact them every month to ask about their

being active, unless someone is willing to give you their e-mail address. Here are some numbers:

Monthly income model per level and total for maintaining 4 active members @ \$2 each:

Level 1: $\$2 \times 4 \text{ people} = \8 , Total now \$8

Level 2: $\$2 \times 16 \text{ people} = \32 , Total now $\$8 + \$32 = \$40$

Level 3: $\$2 \times 64 \text{ people} = \128 , Total now $\$8 + \$32 + \$128 = \168

Level 4: $\$2 \times 256 \text{ people} = \512 , Total now $\$8 + \$32 + \$128 + \$512 = \$680$

Level 5: $\$2 \times 1024 \text{ people} = \2048 , Total now $\$8 + \$32 + \$128 + \$512 + \$2048 = \text{*** } \2728 ***

Yearly income: $\$2728 \times 12 \text{ months} = \$32,736$

Monthly income model per level and total for maintaining 5 active members @ \$2 each:

Level 1: $\$2 \times 5 \text{ people} = \10 , Total now \$10

Level 2: $\$2 \times 25 \text{ people} = \50 , Total now $\$10 + \$50 = \$60$

Level 3: $\$2 \times 125 \text{ people} = \250 , Total now $\$10 + \$50 + \$250 = \310

Level 4: $\$2 \times 500 \text{ people} = \1000 , Total now $\$10 + \$50 + \$250 + \$1000 = \$1310$

Level 5: $\$2 \times 2500 \text{ people} = \5000 , Total now $\$10 + \$50 + \$250 + \$1000 + \$5000 = \text{*** } \6310 ***

Yearly income: $\$6310 \times 12 \text{ months} = \$75,720$

Monthly income model per level and total for maintaining 6 active members @ \$2 each:

Level 1: $\$2 \times 6 \text{ people} = \12 , Total now \$12

Level 2: $\$2 \times 36 \text{ people} = \72 , Total now $\$12 + \$72 = \$84$

Level 3: $\$2 \times 216 \text{ people} = \432 , Total now $\$12 + \$72 + \$432 = \516

Level 4: $\$2 \times 1296 \text{ people} = \2592 , Total now $\$12 + \$72 + \$432 + \$2592 = \$3108$

Level 5: $\$2 \times 7776 \text{ people} = \15552 , Total now $\$12 + \$72 + \$432 + \$2592 + \$15552 = \text{*** } \18660 ***

Yearly income: $\$18660 \times 12 \text{ months} = \$223,920$

Monthly income model per level and total for maintaining 7 active members @ \$2 each:

Level 1: $\$2 \times 7 \text{ people} = \14 , Total now \$14

Level 2: $\$2 \times 49 \text{ people} = \98 , Total now $\$14 + \$98 = \$112$

Level 3: $\$2 \times 343 \text{ people} = \686 , Total now $\$14 + \$98 + \$686 = \798

Level 4: $\$2 \times 2401 \text{ people} = \4802 , Total now $\$14 + \$98 + \$686 + \$4802 = \$5600$

Level 5: $\$2 \times 16807 \text{ people} = \33614 , Total now $\$14 + \$98 + \$686 + \$4802 + \$33614 = \text{*** } \39214 ***

Yearly income: $\$39214 \times 12 \text{ months} = \$470,568$

Keep in mind that it does not matter what day of the month that someone chooses to be active. It DOES

matter that they are active on that day EVERY month. The key to this is DUPLICATION! You must treat this

as a business. If you treat it like a hobby that is how it will treat you. You could even organize small meetings with your people and their prospects and work with your leaders. Think of how easy this would be for you, how reasonable this is, and of how good the chances are of it working for you. You may need to hire someone to open all the envelopes.

NOTE: I decided on \$2 instead of \$1 because it is more feasible and it won't matter much for someone to send \$2 as opposed to \$1. Also I was against \$5 as that becomes too expensive to duplicate.

Mail \$2 every month with a piece of paper saying "I am loaning you this \$2 as an act of goodwill to help you in your financial need, you may pay me back if and when you can" to the following needy people:

#1 Robert Jezil
114 Jefferson Ave.
Slidell, LA 70460

#2 Phil Walther Jr.
9495 Annapolis Lane North
Maple Grove, MN 55369

#3 C. E. Burkman
