
Subject: Using plot_io

Hi there,

I'm trying to do a log. plot of a series of one dimensional array (e.g. plot_io, data(i,0:500)). Strangely, most of the plots have a y-scale which goes from 0 to 1 (and this is a log plot!). Occasionally it will plot the data on a true log plot, like one set out of 12. I've tried to check the arrays, and although some numbers are very small (e.g. E-5) there is no 0 value.

I'm using version 3.61. Is it a bug with the soft. or is it my fault? being still a novice, the money is on me! Can anyone help?

Thanks for your time
