If I understand your problem, the solution is the DEVICE procedure with the [XY]SIZE and [XY]OFFSET keywords. These allow you to specify the size and location of your plot window on the page. You might want to check out the IDL FAQ ([http://ww2.sd.cybernexus.net/~mgs/idl\\_faq.html](http://ww2.sd.cybernexus.net/~mgs/idl_faq.html)) as well, specifically, questions T12 and T14.
