Subject: Using plot_io (with correct address)
Posted by john Slavich on Mon, 11 Aug 1997 07:00:00 GMT

Hi there,

I'm trying to do a log. plot of a series of one dimensional
array
(e.g. plot_io, data(i,0:500)). Strangely, most of the plots have a
y-scale which goes from 0 to 1 (and this is a log plot!). Ooccasionally
it will plot the data on a true log plot, like one set out of 12. I've
tried to check the arrays, and although some numbers are very small
(e.g. E-5) there is no 0 value.
I'm using version 3.61. Is it a bug with the soft. or is it my
fault?
being still a novice, the money is on me! Can anyone help?

Thanks for your time
