I'm running IDL 5.0 on a DEC alpha running OSF 4.0B

I'm getting a new error on IDL code that has been working for the last year. The error started after the OSF and IDL upgrade, so I don't know which is the culprit.

The error is:

```
% Unable to free memory: from array descriptor.  
No such device or address
```

The error has happened running 2 different IDL programs.

Has anyone seen this error? I've been using IDL for about 10 years and have never encountered this.

Thanks for any help.

Chuck
