Hi all,

A simple question: how does one change the font used by the dialog_pickfile function in IDL 5.0 ? I used to be able to do this easily for the pickfile routine using the widget_control command: e.g.

```
widget_control,default_font='12x24'
```

but this apparently has no effect on dialog_pickfile.
I am using a Sun Ultra 1 (model 140) running solaris 2.5.

Any help would be appreciated.

Cheers,
Geoff Taylor.
