```
graph TD
    base --> con_base
    base --> dis_base
    con_base --> junk
    con_base --> data_val
    dis_base --> draw_area
```

Maybe RSI can? This is a known problem. The workaround is to use WIDGET_CONTROL, UPDATE=0 worked for me, but I just tested it here, to no avail :-((
Yeah, this sucks.
