Hi all -

I realized from a post a few minutes ago that my WWW site had disappeared. I just got off the phone with my ISP. They lost their main hard drive last Friday and didn't feel it was a priority to notify anyone. Needless to say, I feel otherwise. Check the site around 1:00PM CDT and you should see things more or less back in order. The FAQ will be version 4.0.2, which is not quite complete. It will also have some "features" that XMosaic users (both of you) will not appreciate. I will remove the features when the FAQ is finished tomorrow.

Sorry (that I have an irresponsible ISP),
