Hello,

we are using idl.el (version from 1996/11/12) and idl-shell.el
(from 1995/09/25) and emacs-19.34

System: sum-sparc-solaris 2.4

Everything seems to work apart from 2 little things:

the Syntax-highlightning and the line-indentation do not work.

In the emacs-19.28 it did work.

Can you guess what is wrong or do you need more information?

Regards and thank you in advance, Ulrich Hiller.
