Subject: AVI reader

Posted by Prof. M.J. Alport on Tue, 30 Sep 1997 07:00:00 GMT

I need to do some image analysis on a captured .AVI file - has anyone
seen/written an IDL .AVI reader - ie the equivalent of the rd_bmp etc -
that will allow me to select the byte image arrays in any particular frame?
At the moment the only solution I have is using the Adobe viewer and then
manually saving each frame as a .BMP...! - I gues I could do this using
"SEND-KEYS" from a VB program - but would really prefer a pure IDL
solution.
Any help would be welcome.
Thanks
