Hi,

I would like to know how to program in envi? More specifically, I want to be able to do a K-Means classification of a large number of images and hence want to write a program to do it.

I would appreciate if you could help me out.

Thank you.

- Shankar

PS- I do not have the ENVI Programmer's guide.

images and hence want to write a program to do it.</BLOCKQUOTE> some questions:1) do you need to know how to implement a K-Means algo?
-
2) do you need to access to images having an ENVI header to use some function written in ENVI
-
(tiles processing, ROI management, ENVI widget etc)?
- <P>I am developing an interactive system (image processing and numerical analysis) to check the quality of the products that will be generated by the new ESA (European Space Agency) satellite ENVISAT. This system is integrated in ENVI and interacts with ENVI.

<P>Tell us what do you need.
