<HTML>
I need a mechanism to automatically exit from IDL,

and not enter in demo mode, if the license is unavailable.

I don't want the message: 'do you want to wait for..... (y/n)?'.

<P>Some idea?

Thank you.

Absolutely. It would be really nice if RSI added an option, like maybe
-nodemo, to IDL which would prevent it from entering demo mode.
Actually even better would be to make it an install time option wether
or not to _ever_ allow demo mode.
