Creating an animated GIF movie requires *much* more
than just having a stack of GIF images in a file,
although that is a start. But to make a movie, you
are going to have to add control elements and all
kinds of other things. There is a lot of software
that can help. (But not IDL, alas.) See this URL
for a good overview:

   http://members.aol.com/royalef/gifanim.htm

Cheers,

David

Do you mean somenthing like

```
window,0,xsize=1024,ysize=800
for i=0,10 do begin
plot,sin(findgen(200))*i,pos=[0.1,0.1,0.9,0.9]
data=tvrd()
write_gif,'d.gif',data,/multiple
endfor
write_gif,'d.gif',/close
end
```
