Is it just me or is there a bug in v5.2 ??

```
a = UIntGen(64,64)
b = Rebin(a,128,128)
```

hello, MacsBug

Erin

I wrote early yesterday:

```
> Oh, my. I guess I'll be calling my broker later
> to buy more Microsoft stock. :-)
```

And then later I see this:

Reuters: Microsoft up 5 3/4 at the closing bell.

Geez, folks, I was kidding!

Cheers,

David

P.S. Let's just say the pizza and beers are on me,
if you want to drop over after work. :-)

According to RSI Tech Support, this problem does not exist in IDL 5.2.1

Ditto for IDL 5.2 on Irix 6.2.

Cheers,

Liam.

Oh, my. I guess I'll be calling my broker later
to buy more Microsoft stock. :-)

Cheers,

David

When I do this example on
{ sparcsunos unix 5.2 Oct 30 1998}
```

I drop out of IDL with a bus error. Eyewww.

Bob

Just tried it on the PowerMac, IDL 5.2.1, works without a glitch. The
upgrade 5.2 -> 5.2.1 is free off the web site as far as I can tell.
Cheers,
Pavel
