Hi all -

I'm working away from my office and didn't realize the IDL FAQ Database server wasn't running correctly. Wayne Landsman clued me in a few minutes ago and I was able to correct it remotely. It should be working OK for everyone. Be sure to clear your browser cache or select reload if it reports the FAQ as not available.

Please let me know if anyone still has trouble accessing the FAQ at
<<http://www.ivsoftware.com:8000/FAQ/default.htm>>.

I'm guiltless on that one. My ISP bit the dust during some electrical storms. Thanks for the heads up.

Thanks for maintaining this.

A note you might like to add is where to find the idl-pvwave archive - I looked this week and could not find it via search engine, or by links from several idl sites which came up in the search.

Regards,
Michael Asten
